

HYSTERESIS DYNAMOMETERS & CONTROLLERS

MHDM-Series

Introduction:

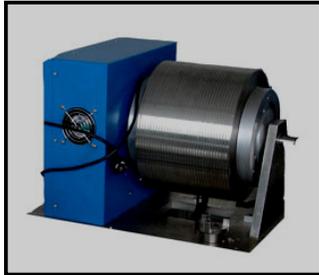

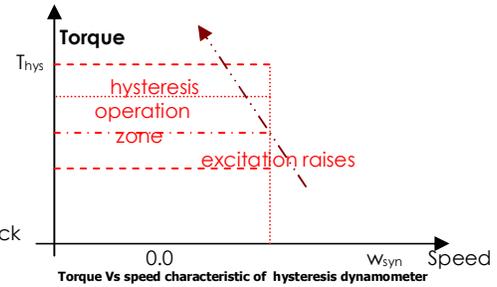

MHDM series of hysteresis coupling/dynamometers are available in more than 100 different models (0.01 to 100.0 kilo watts), virtually offering solutions to speed to torque/power, control/characterization in paper, machine-tools, plastic/yarn, milk/brewery plant, petrochemical industry, organic/inorganic chemical, rubber, sugar, textiles, water management/treatment, heavy electrical/mechanical industries, research and development organizations and many defence applications. Special machine design ensures better efficiency and enhanced torque transmission.

Operating Principle:

Hysteresis dynamometers are of absorption type and exploit the hysteresis characteristic of magnetic material. These dynamometers generate constant hysteresis retarding torque irrespective of angular speed. The primary element of a hysteresis dynamometer is a metal rotor with special magnetic/electrical properties with high resistivity rotating under the influence of a uniformly distributed magnetic field by virtue of which there develops retarding hysteresis torque space domain without any stray eddy current torque. Hysteresis torque is generated by stable magnetic field produced by the high frequency feedback controlled chopper.

Power and torque developed by the dynamometer/ coupling is as under...

$$P = 0.438I_r^{1.6-1.8} \times N \text{ and } T = 0.438 \times I_r^{1.6-1.8} \text{ (approx)}$$

Hysteresis Dynamometer Controllers/Console Specification:

Operating voltage 220 volts/110volts D.C.
 Absorbed power: in various model from 10 -10,000 Watts
 Excitation current 0.0- 50.0 amps (max)
 Rpm: upto 25,000 rpm
 Nominal torque: as above .
 Loading power repeatability: 99% of loading
 Loading torque repeatability : 99% of load torque
 Loading power/torque accuracy: 99% of set point
 Loading power/torque resolution: **10⁻¹/10⁻⁴/10⁻⁵ watt or 10⁻¹/10⁻³/10⁻⁵ N.m**
 Load control: cascade mode feed back control (constant power/torque)
 Overload: 25% for 15 min
 Frame O.D. : 3" to 18"/Frame length: 20 inch
 Shaft diameter: 0.5" - 3"
 Coupling: star
 Soft start: 0.1-10 second adjustable
 Display: Power/torque/rpm/Temperature/rpm/volt/amps/fuel flow ... (3-1/2 digit)
 Accessories: 1. Common base with anti vibration pad 2. coupling and guard 3. volt/ampere meter, 4. RPM /Torque/power meter 5. Temperature indicators including one differential Temperature Sensor) 6. Torque transducer 7. Vibration dampers
 Switch gear/protection: 1. MCB 2. 3. Main line/ output power indication with field failure Protection (provision of main supply to be made at IIT end)
 Additional: desired indication/switching provision

Dynamometer Controller/Console

Dynamometer Controller Size:

MHDC-00150	08X06X06	MHDC-02010	14X12X12	MHDC-00420	12X10X10	MHDC-10003	20X18X18
MHDC-00240	10X06X06	MHDC-04006	16X14X14	MHDC-00515	12X10X10	MHDC-20003	20X18X18
MHDC-00330	12X08X08	MHDC-05005	18X16X16	MHDC-00710	12X10X10	MHDC-40003	20X18X18
MHDC-01080	12X10X10	MHDC-80003	20X18X18				

Three numerals x 100 after MHDM indicates power of Hysteresis dynamometer and Last two digit indicate R.P.M.X1000. Hysteresis dynamometer/coupling with tailor made specification are also available.

MOTORON SEMICONDUCTORS CORPORATION

HYSTERESIS DYNAMOMETERS & CONTROLLERS

Application/Utility

MHDM-Series

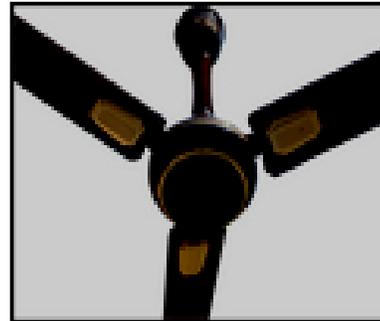

Ball bearing chareterization

Coupling power transmissioin chareterization

Blower fan motor chareterization

Ceiling fan motor/blade chareterization

Food Processor chareterization

Tyre power chareterization

Gear box/lube oil Tribology

Hydraulic motor charecterization

Brake Lining
