

RHEOSTAT

HIGH POWER /INDUCTIVE & NON-INDUCTIVE

Applications:

Automobile, D.C. /A.C. drives. control engineering, avionics, instrumentation, heavy industrial applications
 Power Switchgear/protection, Slip ring motor starting, nuclear, solid state physical application, X-ray,
 Power supplies Nuclear/power plant/heavy electrical and mechanical engineering, packaging,
 Special performance sensor actuators for linear/rotary motion control, generation//transmission/distribution.

Introduction:

MWWR series of power rheostate are silicon coated/vitrious wire wound resistance are improved version of mangnin/eureka/other precision alloy ensuring better thermal stability over wide power range. Variable resistance in manual/auto mode is achieved by a rider with high melting pint/corrosion resistance(climatic/electrochemically) moving linearly over rheostate..These rheostate are coated with special siloxane coating/ceramic coating to ensure high dielectric strength of wiring. In some cases these resistance may be offered coating withstanding higher temperature range. End terminal are either tin coated brass or copper metal. Tailor-made resistances are always encouraged.

Benefits:

- High flash temperature / Better temperature operating range.
- Easy installation, Non abrasive/ chemically compatible.
- Stable power dissipation over specified working ranging.
- High energy density/thermal stability/dielectric strength coating.
- Moisture resistance
- Vibration /shok resistance

Low Power Manual Rheostate

High Power Manual Rheostate

Tentative Drawing

Electrical/Mechanical specifications:

Power: 200 to 10000 Watts

Model	Power watt	Length m.m.	O.D. m.m.	I.D. m.m..	L _{total} m.m. A	W _{total} m.m. B	W _{lead} m.m.	T _{lead} m.m	R _{min} ohm	R _{max} ohm

General Electrical/Mechanical Technical Specification:

- Resistance Range: 0.0-500 ohm
- Resistance tolerance :R ±5%(J) ±10%(K)
- Terminal: tin coated copper
- Coating: siloxane modified polymer(glazed/non-glazed)
- Temperature coefficient (-55°C-155 °C): ±350PPM/□ Max
- Short-term over load :1000%rated power 5s
- Rated Load Rated wattage 30 min: □R±(2%+0.05Ω)
- Effect of Soldering:□R±(0.2%+0.05Ω)
- Insulation Resistance: 5-6 over 1000MΩ
- Moisture Resistance: 1000hr □R±(2%R₀+0.05Ω)
- Moisture-Proof load life (40 °C 95%RHon ~ off cycle 1000 hrs.): □R±(5%R₀+0.1Ω)
- Load Life 40 °C 95%RHon ~ off cycle 1000 hrs.
- No flammability (500%, 1000%, 1600%): not flamed
- Terminal tensile strength: 22.2N for 5w-25w, 44.4N for all other
- Dielectric resistance of coating: 500 volt/1000 volt/3000 volt
